Deep Poverty

MAIN STAGE EVENT

Opening Session and Keynote

Deep poverty affects more than 18.5 million people in the United States. For many, it's a condition that persists generation after generation. Psychology can help lift people out of this vicious cycle. Hear our 2019 APA President share her powerful first-hand experience, learn from our CEO how APA is transforming to have more impact on critical issues like this one, and be inspired by a nationally acclaimed advocate for the underserved.

Gun Violence

MAIN STAGE EVENT

An Event on the Power of Community

Whether it's living with the threat of a school shooting, or a factor in everyday life, every American has been affected by gun violence. The problem can seem intractable, yet every psychologist has an opportunity to better prepare their communities to reduce and prevent violence. An ex-convict from Chicago's South Side returns home to interrupt violence at the level of whispers, while an author and developmental psychologist addresses early assessment and how to encourage nonviolent choices at a community level. Finally, a Sandy Hook mother, family therapist, and advocate takes a radically inclusive approach to protecting our communities.
